

RESOLUTIONS

ON THE DEATH OF THOMAS H. MONTGOMERY.

In the death of Professor Thomas H. Montgomery, Jr., on March 19, 1912, the Entomological Society of America lost a member whose entomological work was concerned mainly with the Hemiptera and the Araneina, dealing with various phases of the morphology, embryology and ecology of these groups in themselves, and as furnishing material for studies on the deeper problems of inheritance and sex-determination. He did not confine himself to these groups of animals but extended his researches to other non-entomological fields of zoology and in all he made valuable contributions to knowledge and to theory.

In appreciation of his accomplishments and in sorrow at his early death, we enter this record on our minutes and extend to Mrs. Montgomery our deep sympathy in her and our loss.

Committee PHILIP P. CALVERT,
 HENRY SKINNER,
 J. H. COMSTOCK.
